

GLOOKO

A COMMITMENT TO SAFEGUARDING PATIENT DATA

With cyberattacks against healthcare systems on the rise threatening patient safety and business operations, protecting patient health data and information security is mission critical. As the premier diabetes and chronic care management platform, **Glooko is committed to protecting patient health data and information security** by achieving rigorous industry-leading third-party certifications. By meeting these standards, we provide customers the highest level of confidence that their patient's sensitive data is safe and secure.

Secure Integrations

HITRUST-certified vendors signal the quality of a vendor and are easier to integrate into your clinic's EHR workflow – simplifying the workload on your healthcare administrators.

Trusted Partnership

Feel confident knowing your patients' health data are protected and eliminate the possibility of introducing vulnerabilities into your system.

HITRUST is a standards and certification body that helps organizations achieve information security, privacy, and regulatory compliance goals, combining HIPAA, NIST, COBIT, and many more frameworks. Glooko's HITRUST Risk-based 2-year (r2) certification places the company in an elite group of organizations worldwide, proving that its attested security controls meet these standards of protecting patient health data.

SOC 2 Type I and II certifications demonstrate Glooko's ability to meet the industry's high standards for security, availability, confidentiality, and privacy. Silicon Valley-based accredited auditors have certified that Glooko's attested security controls and policies work extremely well in securing patient health data.

The ISO 27001 international information security management standard and certification recognizes the health and robustness of an organization's overall information security program, while helping an organization safely and securely manage and protect its assets.

ABOUT GLOOKO

Glooko improves health outcomes of people with chronic conditions through its personalized, intelligent, connected care platform. Our proven technologies make lives better by revolutionizing the connection between patients and providers, driving patient engagement and adherence via digital therapeutics, and accelerating the speed of clinical trials. Our company leadership team is deeply involved, making the security of personal and protected data our highest priority in every aspect of Glooko culture and practice. For any security issues please reach out to security@glooko.com.
