

POPULATION HEALTH: BILLING EXPORT UPDATES

With Glooko's Billing Export functionality, professional users are able to determine which patients are eligible for RPM CPT Code reimbursement for a given calendar month. Our latest update to Billing Export feature clearly defines if a patient has completed 16 days of remote uploads, when the 16th remote upload was completed, if there were any in-clinic uploads present and date of first in-clinic upload within the calendar month query range.

Combined, these new enhancements provide professional users the information needed to properly bill for remote patient monitoring – creating a streamlined process for submitting billing codes for reimbursement.

Upload Statistics (based on queried time range)			
Achieved 16 days of daily remote data in query range (T/F)	Date of 16th day of daily remote data (if true)	In-clinic uploads present in query range (T/F)	Date of first in-clinic upload (if true)
TRUE	2022-01-16 02:08:44	TRUE	2022-01-01 07:45:10
TRUE	2022-01-19 10:25:00	FALSE	
TRUE	2022-01-16 08:30:22	TRUE	2022-01-10 13:00:00
FALSE		FALSE	
TRUE	2022-01-22 16:21:06	FALSE	
TRUE	2022-01-28 13:55:12	FALSE	
FALSE		TRUE	2022-01-04 10:37:55

Highlighted rows are examples of eligible CPT Code 99454 reimbursement. For more information on 2022 CPT codes for RPM, see back page.

The latest update to Billing Export now enables Enterprise users to see:

Achieved 16 days of daily remote data in query range (T/F)

In order to be eligible for CPT-99454, a patient must have at least 16 days of remote data in a calendar month. If a patient has achieved the minimum 16 days of remote uploads, a TRUE value will appear. The data within “16 days” can be a combination of data types (e.g. SMBG, CGM, Insulin, Weight, BP, etc.). However, if readings from two different data types are collected on the same day, then this will still count as one day.

Date of 16th day of daily remote data (if True)

This column easily identifies the patient's 16th day of remote uploads.

In-clinic uploads present in query range (T/F)

If an in-clinic upload is present within the query range a TRUE value will appear. This makes it easier for clinics to differentiate between in-clinic and remote uploads.

Date of first in-clinic upload (if True)

This new column displays the date of patient's first in-clinic upload, if the user has had an in-clinic upload during the query date range.

2022 REMOTE PATIENT MONITORING CODES

In the 2022 Final Rule, Centers for Medicare and Medicaid Services (CMS) continued to show its support for telehealth and remote patient monitoring. Payments for the five CPT codes were adjusted and the new amounts can be seen in the table below.

99453	Initial setup of the device, including patient education on use of equipment for remote patient monitoring.	\$19
99454	Monthly remote monitoring with daily recordings. Billed each calendar month and must have a minimum of 16 days of remotely uploaded data. To meet CPT-99454 criteria, data needs to be collected via a medical device (CMS specifies that the device must meet the FDA's definition of a medical device as described in Section 201(h) of the Federal, Food, Drug and Cosmetic Act) and collected data needs to be relevant to the observed chronic condition.	\$56
99457	Monitoring and treatment management, which requires interactive communication between the patient and caregiver for the first 20 minutes during the calendar month.	\$50
99458	Each additional 20 minutes of interactive communication between the patient and caregiver during the calendar month	\$41
99091	The time it takes for qualified clinical staff to gather, interpret and process monitoring data, at least 30 minutes every 30 days. Does not require interactive communication with patients.	\$56

National payment amounts, rounded non-facility price *
 * All rates calculated using the 2022 RVU multiplier of 34.60 and total non-facility RVUs

If CPT-99091 is utilized during the calendar month, then CPT-99457 and 99458 cannot be used in the same month for the same patient. Conversely, if CPT-99457 and/or 99458 are used in the same calendar month, CPT-99091 cannot be used.

For more information, contact your Glooko Account Manager.

*Per CMS policy on reimbursements, patients must agree and opt-in to be enrolled in an RPM program to qualify for the minimum of 16 days of data is captured in a 30-day period. Not all payors reimburse for CPT RPM. Reimbursement policies vary by state and payor, please consult your billing specialist on policies for your local area or region.
