May 15, 2023

Glooko 411 High Street Palo Alto, California 94301-1621

Based upon the procedures performed by an Authorized External Assessor which indicated that there were no material changes to the control environment that would result in Glooko ("the Organization") no longer meeting certification criteria of the HITRUST Risk-based, 2-year (r2) certification, the following platform, facility, and supporting infrastructure of the Organization ("Scope") continue to meet the HITRUST CSF® v9.1 Risk-based, 2-year (r2) certification criteria:

## Platform:

Glooko Core Platform System residing at Amazon Web Services sites in US-East (N. Virginia, Ohio)

## Facility:

 Amazon Web Services sites in US-East (N. Virginia, Ohio) (Data Center) located in N. Virginia, Ohio, United States of America

The initial certification was awarded to the Organization on 05/13/2022 and is valid for a period of two years assuming the following occurs:

- Annual progress is being made on areas identified in the Corrective Action Plan(s) (CAPs).
- No data security breach reportable to a federal or state agency by law or regulation has occurred within or affecting the assessed environment.
- Either no significant changes in the business or security policies, practices, controls and
  processes have occurred that might impact its ability to continue to meet the respective
  HITRUST Assurance Program criteria, or—where there were changes—procedures
  performed by the external assessor indicate the Organization's control environment
  continues to meet the criteria against which the Organization was initially assessed.

Based upon the work performed by the Organization's external assessor, HITRUST is of the opinion that the requirements of the HITRUST v9.1 Risk-based, 2-year (r2) certification continue to be met.

Additional information on the HITRUST Assurance Program can be found at the HITRUST website at <a href="https://hitrustalliance.net">https://hitrustalliance.net</a>.
